

ERRATA CORRIGE. Alberto Pettorossi: Sequential and Concurrent Programming in Java. Aracne (2005). February 2012.

'n, ± m' stands for 'page n, line ± m'.

3, +6. This message *should be*: This program

39, -2. `constructSolution()` *should be*: `advance()`

44, +17, +18. `QueensSimpleSolver` *should be*: `QueensSolver`

51, +17. It is better to have: `private Vector` *instead of*: `Vector()`

108, -2. bounded overtaking *instead of*: non-bounded overtaking

155, +10, +11. Add the base 10 before the exponents. Thus, for instance, we will have  $\pm 1.4 \cdot 10^{-45}$ , instead of  $\pm 1.4^{-45}$ .
